EBL1000

EV Battery / Table Lift

The Atlas EBL1000 is the perfect solution for a variety of workshop lifting solutions – engines, gearboxes and now Electric Vehicle batteries.

With the introduction of EVs, safe access and removal of the battery is an obvious lifting challenge. There are a number of solutions on the market, and the EBL1000 is a fantastic EV battery/table lift option from Atlas. Employing electro-hydraulic operation, this table lift offers a single-plane automatic tilting table and uses twin hydraulic cylinders to provide an impressive 1000kg lifting capacity.

Key features:

- 1000kg lifting capacity
- No installation required
- Lifting height 1130mm to 1800mm
- Hydraulic lifting with electric tilting allows seamless connection with battery/vehicle component
- Easy-position tabletop with 30mm two-dimensional movement for perfect alignment

Perfect for
EV batteries,
engines and
gearboxes!
